

PROJECT FALCON-01 — COASTAL MONITORING BUOY

MASTER ASSEMBLY · SUBSYSTEMS · ELECTRONICS · POWER · MOORING · V2 CAD REFERENCE

REFERENCE / NOT FOR FABRICATION

A — FRONT ELEVATION · CAD-PROJECTED

FLOAT Ø0.650 m · V2 CAD REF

Overall installed height and loaded waterline: VERIFY IN NATIVE CAD / FLOTATION TEST

B — RIGHT ELEVATION

ORTHOGRAPHIC · DO NOT SCALE

C — PLAN VIEW

D — ELECTRONICS POD / EQUIPMENT PLAN

Orange Pi excluded · shore Bay Station only

E — EXPLODED ASSEMBLY VIEW · NTS

E01
SENSOR PLATFORM

E02
DUAL SOLAR ARRAY

E03
TAPERED FRAME

E04
SEALED ELECTRONICS POD

E05
FLOAT / KEEL

E06
BALLAST + MOORING

Exploded reference only · separation gaps are not dimensions

F — SUBSYSTEM INTERCONNECTION / DATA FLOW

SENSORS → PROTECTED POD I/O → ESP32 ACQUISITION → LTE/INTERNET → SHORE BAY STATION / DASHBOARD

G — POWER MANAGEMENT

CAD envelopes above · standard electrical symbols below · ratings controlled by measured load test

H — MOORING / ANCHORAGE

CHAIN / CONNECTING HARDWARE

CONCRETE ANCHOR · CAD REF

Scope, WLL, corrosion allowance and anchor mass remain site-engineering verification items.

J — CONTROLLED COMPONENT REGISTER

ID	COMPONENT	STATUS	FUNCTION
S01	Blue Robotics Bar02 R2	PROTOTYPE	Pressure / wave input
S02	Adafruit Ultimate GPS PID 746	PROTOTYPE	Position / geofence
S03	SparkFun SEN-15901	PROTOTYPE	Wind speed / direction
S04	Blue Robotics Celsius R2	CANDIDATE	Water temperature
H01	Adafruit MCP9808 PID 1782	SELECTED	Enclosure temperature
H02	Adafruit INA260 PID 4226 x2	PROTOTYPE	Battery / solar health
C01	ESP32-DevKitC V4	SELECTED	Buoy controller
C02	SIM7600G-H 4G HAT	CANDIDATE	Cellular telemetry
P01	LiFePO4 12.8 V 20 Ah	RATING SET	Exact SKU / case TBD
SEC	Contact switch PID 375	PROTOTYPE	Enclosure-open state
A01	Buzzer + driver	TBD	Audible security alarm

K — SIMPLIFIED SENSOR / CONTROLLER WIRING

Functional wiring only—KiCad schematic controls pin numbers and manufacturing netlist · Orange Pi remains ashore

L — GENERAL NOTES

- Orthographic linework is projected from PROJECT-FALCON-V2.glb.
- V2 geometry remains a proposed replacement reference.
- Do not scale this drawing; verify native CAD and purchased parts.
- Dimensions, mass and placement marked TBD must not be invented.
- Complete stability, structure, ingress, thermal and mooring reviews.
- Orange Pi/Bay Station computer remains ashore.

PRELIMINARY ENGINEERING REFERENCE

M — DRAWING CONTROL

PROJECT	DRAWING TITLE
FALCON-01	MASTER ASSEMBLY & SYSTEMS
DRAWING NO.	FALCON-BP-000
SCALE	NTS
SOURCE	V2 GLB + DOCS
REVISION	P0
DATE	2026-09-01
STATUS	REFERENCE

RELEASE GATES / APPROVAL

- ☐ Native CAD dimension audit ☐ Purchased-part fit / connector clearance ☐ Loaded mass / displacement / waterline / freeboard
- ☐ CG / stability / righting test ☐ Structural load and fastener review ☐ IP / leak / thermal / corrosion validation
- ☐ Solar / battery measured load budget ☐ Pressure installation and wave-reference validation ☐ Mooring WLL / anchor design review
